

Preparation for Endoscopy**Endoscopy**

Endoscopy, referred to as an EGD is a visual examination of the upper intestinal tract using a lighted, flexible fiber optic endoscope. This Procedure requires mild sedation The Endoscope is gently inserted through your mouth into the upper esophagus. Then the Endoscope is passed into the stomach and duodenum, or the first portion of the small intestine. The thoroughness of this intestinal cleaning depends on you.

Without your cooperation, the examination cannot accomplish its purpose and may have to be repeated.
